EPI | DESIGN YOUR LIFE

For more than thirty years, EPI has been manufacturing and delivering first-rate products to floor specialists all over the world. We are extremely proud of our most recent innovation: the EPI Superbase cast floor. You won't find this combination of incredible strength, uv stability and intense comfort anywhere else.

Stylish

Looking for a floor that combines a stylish appearance with proven durability? An EPI Superbase cast floor is a resilient and seamless interior solution for private homes, offices and retail spaces.

Greater comfort

The EPI Superbase cast floor is extremely comfortable on its own. The floor feels soft and has a warm touch - especially when combined with floor heating. If you're looking to raise the comfort level even higher, you can choose for an extra acoustic layer which provides up to 20db of impact sound reduction and increasing the crack bridging characteristics of your EPI Superbase cast floor.

Incredible strenght

Comfort and durability don't always go hand in hand. Yet our R&D team has successfully developed a floor with both these qualities. Because an EPI Superbase cast floor is considerably less pressure-sensitive than other cast floors, it is more resistant to point loads.

Low-maintenance

An EPI Superbase cast floor is easily to keep clean, virtually maintenance-free and can be installed in combination with floor heating or over existing floors without any problems at all.

Natural material

EPI is a family-owned business. Corporate social responsibility is ingrained in our DNA. Our goal is to see future generations be able to grow up healthy and happy. This is why EPI products consist mainly of unprocessed natural materials such as biopolymers and natural fillers, making them an environmentally-friendly option.

EPI Clean | Solid

Long lifespan

An EPI Superbase cast floor is something you can enjoy for years and years. Sunlight will not cause any yellowing or discolouration, meaning the colour stays as vibrant as the first day. The floor also has an unparalleled average life expectancy of forty years.

Specialised floor dealers

At EPI, we make floors – we don't install them. We leave that to our global network of very experienced EPI approved floor dealers. Each and every one of our partners has a passion for their field and an eye for detail.

EPI Colour Collection

We will be happy to help you choose the colour that best fits your residential or office setting. To ensure a solution for every space, we have developed the EPI Colour Collection: an attractive palette of Solid and Blend colours. The Solid colours consist of a single, uniform colour for a sleek finish. The colours in our Blend range combine two shades for a more organic effect.
