SEAMLESS & NATURAL

CS Silky Screed | Blend

CORESTONE | Realising the impossible

In a world, where durability and design becomes more prominent, we have developed a product with the natural look and structure of concrete, and with extremely strong properties. Our product is available in many earth shades, both in a uni colour and in a blend version. The system is seamless and can be applied easily to floors and walls.

Discover the power of Corestone!

A natural design product that is sturdy and blends in with every interior. Whether it is for rooms in a house, a store, an office or a showroom: with Corestone you step into an innovative world.

CORESTONE | The natural design look for everyone

The high-quality floor and wall covering has multiple strong properties. Corestone is stronger than many other products with a concrete look, does not shrink, and can be applied on top of existing tiles. It is therefore for good reason that Corestone is suitable for many applications, both in houses: livings, hallways, bathrooms, and in retail, showrooms, meeting facilities and canteens. Its possibilities are unlimited, as Corestone is suitable for both new buildings and high-quality renovation projects.

Properties:

- Minimum layer thickness (2-5mm)
- Seamless
- Wear-resistant
- Fluid-tight
- Good antiskid properties
- High resistancy to chemicals
- Solvent-free
- Antiallergic
- Fire-retardant
- Exclusively for interior use

Advantages:

- Suitable for floors and walls
- Easily applicable on top of tiles, casting floor or covering floor
- On top of existing substrates: no demolition costs
- Can be applied on top of underfloor heating
- Easy to maintain and easy to clean
- Quick application
- Short drying time
- Very long lifespan

CORESTONE | The floor that remains beautiful

EXTREMELY STRONG

This unique system is a strong piece of work. Resistant to many types of loads and very wear-resistant.

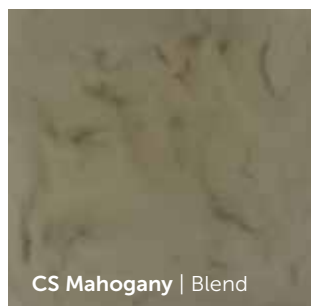

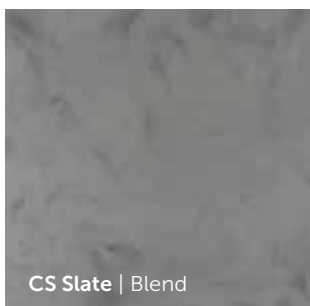

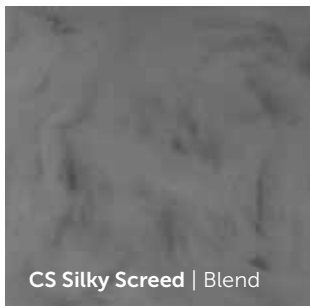

ROBUSTLY MATT

A natural stone look with a matt finish. Applicable by professionals with craftsmanship.

NATURALLY DURABLE

Consists for 90% of direct raw materials and is produced with products from European class A suppliers.
